PLASTIC PLANTERS SPECIFICATION DATA

MODULAR DRUM PLANTER

SKU: 304.0365

Description

The Modular Drum GRP planter is a lightweight, durable solution for creating bold planting schemes in streetscapes, plazas, and commercial spaces. Manufactured from glass-reinforced plastic (GRP), it offers frost-proof, corrosion-resistant performance and is available in granite-effect, stone-effect, or any RAL colour with matt, satin, or gloss finishes. Its modular cylindrical design allows flexible layouts, while optional drainage holes and removable liners simplify maintenance. Perfect for architects and contractors seeking specification-ready, low-maintenance planters with contemporary appeal. It's available in any RAL colour, add this to the notes at checkout.
