

MANCHESTER FLEXIBLE

SKU: 501.1440

Description

The Manchester PU Bollard is a durable, impact-resistant bollard designed for pedestrian protection and traffic management in busy urban environments. Manufactured from polyurethane cast around a mild steel core, it combines the appearance of traditional bollards with the flexibility and resilience of modern materials. The bollard offers excellent resistance to corrosion, weathering and low-speed vehicular impacts, making it suitable for high-footfall locations with minimal ongoing maintenance.
