

HEIGHT RESTRICTION

SKU: 503.0411

Description

Our Height Restriction Barrier provides reliable vehicle access control by physically limiting clearance heights up to 2,200mm or adjustable up to 3,570mm, ideal for protecting sensitive spaces like car parks, underpasses and restricted zones. Constructed from galvanised steel with a white lacquer finish and vivid red reflective strips, it ensures clear visibility in all conditions while offering low-maintenance durability. With a robust two-piece adjustable crossbar and reinforced root-fixed base plates, this barrier delivers precision installation for road widths from 3.85m to 7.55m. PDF specifications and optional signage and gauge-rail kits are available to support seamless design and specification processes.

Standard Dimensions

Length x Height (mm)
3850 x 2200
