

HENNESSY CYCLE COMPOUND

SKU: 107.1438

Description

The Hennessy Cycle Compound is a modular, gated cycle storage solution designed to provide enhanced security for larger groups of bicycles in shared or public-realm environments. Constructed from a galvanised steel frame and clad with UV-stable transparent panels, the compound offers weather protection while maintaining visibility and passive surveillance. Built in standard modules 4-metre bays, the system can be extended to suit site capacity requirements and configured with a choice of access controls.
