

MOOVE PL SEATING

SKU: 301.1278

Description

MOOVE is a contemporary, sculptural circular bench made from rotationally moulded plastic, designed by Lars Vejen as a playful, modern reinterpretation of the classic backless bench. Its generous 2.4-metre diameter provides flexible, multi-directional seating for groups or individuals, allowing users to sit on, around or even inside the circular form. Available in bold colours such as orange and red, or in a more understated black, MOOVE introduces identity, energy and visual impact into parks, public spaces, learning environments and indoor atria. As part of the BSFG portfolio and manufactured by our sister company HITSA, MOOVE delivers durable, low-maintenance, weather-resistant seating for modern placemaking.
