

ANGLED SAFETY BARRIER

SKU: 503.0416

Description

The BSFG Corner Safety Barrier range is engineered to safeguard structural corners and high-risk areas from vehicle collisions, ensuring site safety and asset protection. Options include Angled Corner Safety Barriers for comprehensive coverage, Short Angled variants for compact spaces, and High Impact models for demanding environments. Manufactured from heavy-duty steel with galvanised or powder-coated finishes, these barriers deliver exceptional corrosion resistance and long-term performance. Their angled design deflects impact forces, reducing damage to walls, columns, and equipment. Available in multiple sizes and configurations, with root-fixed or surface-mounted installation, they integrate seamlessly into car parks, logistics hubs, and industrial sites. Optional reflective markings enhance visibility, while technical datasheets and CAD drawings (PDF/DWG) simplify design and tendering.

Standard Dimensions

Length x Width x Height (mm)

- 580 x 600 x 430
- 600 x 600 x 350
- 600 x 600 x 1200
- 800 x 600 x 1000
- 600 x 600 x 600
- 1000 x 600 x 1000

Diameter (mm)

60
