

KONUS BOLLARD

SKU: 501.0301

Description

The Konus Recycled Rubber Flexible Bollard by BSFG combines sustainable design and resilient performance, crafted from recycled granulated rubber to flex under impact and recover its position. At 740 mm high with a 140 mm diameter, it's a bolt-down solution ideal for car parks, loading bays, and internal circulation zones. Surface-mounted on a 305 mm diameter flange, the Konus bollard withstands 200 kg of force without damage and returns upright—minimising maintenance and replacement costs.

Standard Dimensions

Height (mm)

810

Diameter (mm)

170
