

BLACKPOOL BOLLARD

SKU: 501.0295

Description

Inspired by traditional streetscape heritage and refined for modern applications, the BSFG Blackpool Cast Iron Bollard offers specifiers a timeless solution to boundary definition and landscape protection. Cast from solid iron and weighing 70kg, its solid construction supports resilience against traffic impact and environmental wear, far surpassing lighter alternatives in durability. With a height of 1100mm and diameter of 180mm, the rounded crown and classic collar detail integrate harmoniously into parks, town centres, promenades and high-street schemes. Available root-fixed for permanence or as a removable variant for event management, the bollard installs within a 400mm deep concrete foundation, optionally including a reflective band to aid visibility in low-light areas. Supplied in standard black powder-coat, BSFG provides custom finishes in any RAL shade, allowing coherent design across urban landscapes.
