

GATOR TEETH

SKU: 503.1306

Description

Gator Teeth provide a highly effective one-way traffic control solution for car parks, private roads, and restricted access areas. Manufactured from heavy-duty steel with a galvanised finish, they allow vehicles to exit freely while preventing entry from the opposite direction. Designed for durability and safety, with integrated spring-loaded teeth and optional signage, these units offer quick installation and low maintenance. Technical datasheets and CAD files are available for specification.
