

NOALE TA W

NOALE TA TW

Table consisting of 40x50x2 mm steel tube supports with 5 mm thick steel supports and two perforated plates for fixing to the floor. The table top is made of five 130x32 mm thick slats of hardwood or thermo-treated pine, and 2 mm thick sheet metal ribs.

All metal parts are galvanised and coated with thermosetting polyester powder.

The hardwood is treated with water-based pigmented impregnation, while thermo-treated pine is supplied not impregnated (impregnation available as an option).

All fixings are in AISI304 stainless steel.

Prepared with holes \varnothing 12 mm for ground fixing through mechanical dowels (not included).
