

LENA 1500 W

LENA 1500 TW

LENA 1500 WPC

Bench without backrest composed of two 5 mm-thick steel sheet supports, with seat in hardwood or thermo-treated pine slats of 40x40mm (top) and 40x100 (sides) or WPC slats, on a 40x20x1.5 tubular steel frame and 3 mm thick folded steel sheet ribs.

Also available in a version with a seating surface made of 40x20x1.5 mm and 40x100x2 mm steel tubes, with connecting brackets made of 3 mm thick steel sheet.

All metal parts are galvanised and coated with thermosetting polyester powder. The hardwood is treated with water-based pigmented impregnation, while thermo-treated pine is supplied not impregnated (impregnation available as an option).

All fixings are in AISI304 stainless steel.

Prepared with Ø 12 mm holes at the base for ground fixing with mechanical dowels (not included).
