

# QUICK

METALCO DEPARTMENT

The QUICK is an ornamental bollard made of tubular galvanized and powder coated steel and is available with three footing options. The QUICK can be fixed to the surface by anchoring the pre-drilled base plate (anchors not provided) or cemented below grade with a suitable extension.

A removable version is also available and is supplied with a steel tube insert that is fixed below grade that connects to a flat laser cut plate that remains flush with the surface. The bollard can be removed from the plate via a special key. Thanks to this design, there are no open holes present once the bollard is removed.

## MATERIAL & FINISH

-Galvanized & Powder Coated Steel

## DIMENSIONS

-D=170mm, H=1001mm

## FOOTINGS

- Surface Mount
- Inground
- Removable
