

CASTEO TA W

CASTEO TA TW

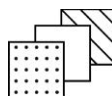

Table consisting of two 50x40x2 mm steel tubular supports and a top with 4 mm thick folded steel sheet frame and 60x32 mm hardwood or thermo-treated pine slats. All metal parts are galvanised and coated with thermosetting polyester powder. The hardwood is treated with water-based pigmented impregnation, while thermo-treated pine is supplied not impregnated (impregnation available as an option). All fixings are in AISI304 stainless steel. Prepared for ground fixing through M10 threaded bars to cement (included).
