

Modular single seat made from a 3 mm thick folded steel sheet base mechanically fixed to a 8mm thick HPL seating surface, through 3 mm thick steel sheet brackets.
Each base is prepared for lateral attachment with the other elements of the CUBIK collection.
All metal parts are galvanized and coated with thermosetting polyester powder.
All fixings are in AISI304 stainless steel.
Prepared with a Ø 12 mm hole for ground fixing with a mechanical mechanical dowel (not included) for outdoor installation or for free standing for indoor installation.
