Functional Art for Functional Fitness

The Placemakers Group

Outdoor Life Design

THE PLACEMAKERS Group is the world's leading brand in design, production and implementation of urban design concepts for physical activity and workplaces for all public or private players involved in the design and/or management of urban areas. Functional solutions for the activation of public spaces as vibrant places, for socialization and the improvement of the quality of life.

Designing with citizen-first mentality.

The main focus in developing outdoor spaces and cities of the future should be citizens and their wellbeing. It is about improving interactions between people and creating the right conditions for socializing, working, playing sports and having fun.

Bridge the gap with nature.

More urbanization could mean less understanding of how we are connected to nature. Our goal is to rekindle the connection between man and nature, satisfying the desire to spend more time outdoors.

Support social language.

Just as every city is unique, every community has its own social "language" that it speaks. MyEquilibria projects highlight and stimulate creation of this "social language".

The Art of the Placemaking.

A space becomes a "living place" when it evokes emotion, drives movement, and creates excuses for creativity or engagement. Placemaking is an art of giving a soul to the urban environments and knowing that this soul comes from people who use it.

Creating outdoor life design spaces for the Homo Urbanus.

With over 50% of the urbanized population, we are entering the new era, in which urban spaces will transform into areas of social, cultural, well-being and economic value.

Infusing outdoor life design spaces with a sense of place & purpose.

A strong sense of place can affect the physical, social, emotional and ecological health of individuals and communities. Our role is to transform beautiful "public spaces" into "living places" that bring immediate and tangible benefits to communities, municipalities and the people who use them.

Where *We are*

1 Game Table

8. Fun & Play: *Chess*

Chess represents an ancient board game and its origins date back to India in the sixth century. Playing chess brings people together, teaches how to win and lose, develops creativity, confidence and helps to stay calm in stressful moments.

“The beauty of chess is it can be whatever you want it to be. It transcends language, age, race, religion, politics, gender, and socioeconomic background. Whatever your circumstances, anyone can enjoy a good fight to the death over the chess board.” - Simon Williams

MyShelter

MyShelter represents a real revolution for outdoor fitness installations with shaders, in just 12sqft (130sqft). Six high-performing concrete plots compose the MyShelter's platform: totally self-supporting and adjustable thanks to supporting feet, they make it easy to install the structure on any type of terrain. MyShelter can also be equipped with plant pots and steel cables for vertical green growth. Thanks to the modular structure of the platform, it is also possible to use multiple modules and compose different configurations according to the customer's needs and project sizes.

I. Performance Fitness: *Bodyweight Accessories*

Working out with fitness accessories such as wall-balls, kettlebells, and resistance bands can offer numerous benefits to your fitness routine. These accessories can help increase strength, improve endurance, build muscle, and enhance flexibility. They also allow for a wide range of exercises that target different muscle groups, providing a well-rounded workout.

Fitness accessories are also beneficial, especially for those who have limited space or those who are short on time. Incorporating fitness accessories into your routine can help you achieve your fitness goals and maintain a healthy lifestyle.
