

Small table made from a 3 mm thick folded steel sheet base mechanically fixed to a frame in steel sheet and metal tube, to which an 8 mm thick HPL disc is attached. Each base is prepared for lateral attachment with the other elements of the CUBIK collection. All metal parts are galvanized and coated with thermosetting polyester powder. All fixings are in AISI304 stainless steel. Predisposed with Ø 12 mm hole for ground fixing with mechanical mechanical dowel (not included) for outdoor installation or in simple support for indoor installation.
