

Modular two-level rectangular bench with a 47° inclined backrest made of a 50x50x2 steel tubular frame onto which WPC slats are fixed by means of special 3 mm thick steel sheet press-folded ribs. The seat can be used in composition with the other elements of the SUNDECKS collection.

All metal parts are galvanised.

All fixings are in AISI304 stainless steel.

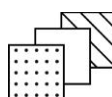

The seats are prepared for installation under the floor level to a depth of 170 mm or prepared with holes Ø 12 mm for fixing to the floor with mechanical anchors (not included) for installation on a finished floor.

## technical data
